

# 撃退 GEKITAI™

GEKITAI™ is a 2-player game where opponents are trying to line up three of their colored pieces in a row. Players take turns placing one of their eight pieces onto any open space on the board. The newly-placed piece "repels" (GEKITAI) all adjacent pieces one space away. If there is no open space on the other side of the pushed piece, it does not move (pieces may only push one piece in a line).

If a piece is pushed off of the board, it is returned to the owning player.

The first player to line up three of their color, or to get all eight of their pieces on the board at the end of their turn, wins!
